

Hi Proprsappers,

Please be advised that we have added a porch and spot light to the shed for the Wednesday **Sunset/Twilight** flying sessions.

We will begin the Sunset to Twilight flying sessions on Wednesday, August 22 followed by the second session on August 29, 2018 . For the month of September the two sessions will be held on Wednesday, September 12 and 26. Rain dates are Thursdays, August 23/30 and September 13/27. **See schedule and times below.**

Since there is no lighting for the charging station, I recommend that you bring a few extra batteries if planning on flying a number of flights. Also, I would recommend that you have some type of personal illumination device (ex. flashlight, iPhone, hat light etc.) since there is no lighting provided in the parking areas or the walkway to the field. Due to this time of year, the mosquitos are very active and recommend the following outwear: long pants, long sleeve shirt or light summer jacket, hat and insect repellent.

If this is your first time flying at sunset, I suggest the following: aircraft should be fully trimmed and flown a few times in daylight, fly close in at moderate power - within a thousand to two thousand to feet, easy on the control input and let your eyes adjust to the different light settings. Once you adjust to sunset flying, you can expand your flying distance and routine as you feel comfortable with.

Please observed the following guidelines:

Flying Guidelines:

1. Only illuminated **electric** aircraft
2. No more than **two** aircraft in the air at a time
3. Pilots must have a **spotter** when flying
4. Starting at **6:00PM** the Gate needs to be **closed** but not locked
5. Adherence to AMA and Club Rules
6. Only pilots and spotters can stand at the side edges of the runway when flying
7. No more than ten (10) minute flights or less depending on the number of flyers participating
8. Absolutely **no flying permitted** after the ending of sessions
9. **Sunset/Twilight flying** is permitted **ONLY** on nights of scheduled club sessions. **No Exceptions!**

Date	Sunset	Twilight	FLYING TIMES
August 22	7:32	8:03	6:30 to 8:30
August 29	7:21	7:50	6:30 to 8:30
Sept. 12	6:56	7:24	6:00 to 8:00
Sept. 26	6:30	6:58	6:00 to 8:00

Go to www.tested.com/tech/570572-how-fly-rc-model-night for a good overview and steps for night flying.
